

Evluent Vertical Mouse 3

The Evluent™ VerticalMouse 3™ is the third generation of the revolutionary mouse from the inventor of the handshake grip. Many users said earlier generations of the Evluent VerticalMouse relieved their wrist and arm pain*.

Ergonomic benefits

- + **Avoids forearm twisting for comfort and good health**

The patented shape supports your hand in a fully upright handshake position that eliminates forearm twisting. Many users said earlier generations of the Evluent VerticalMouse relieved their hand, wrist, or arm pain. See the Evluent web site for user comments.

- + **An approved mouse of University of California at Berkeley**

The Evluent VerticalMouse 2 (an earlier model identical in concept) was evaluated in 2007 by a team at the health services clinic in UC Berkeley, including medical doctors, physical therapists, ergonomists, and administrators. It was found to be comfortable, easily adapted to, and promote a neutral wrist and forearm posture. It was the only vertical type mouse approved for staff use within UC Berkeley and for sale in the campus store at that time.*

Easy to use buttons

All 5 buttons are easily operable without contorting your fingers.

4 pointer speeds

The dpi values are 800, 1300, 1800, and 2600.

Avoids forearm twisting

The patented shape supports your hand in a fully upright handshake position that eliminates forearm twisting. Many users said earlier generations of the Evluent VerticalMouse relieved their hand, wrist, or arm pain.

Programmable

5 buttons are each programmable with different functions in different applications, for example, a button can be Double Click in one application and Ctrl in another application.

Other benefits

+ Extra-wide lip

A small lip on the bottom edge prevents the little finger from rubbing the desk.

+ Evluent is suitable for those allergic to rubber

People allergic to rubber can use the Evluent mice with no harm. There is no latex or rubber in the Evluent mice. The scroll wheel, for example, is of silicone.
