

Evluent VerticalMouse D

VMD improvements compared to VMC and VM4

1. Grooved buttons for fingertips improve grip. This is a significant innovation protected by Intellectual Property Rights. The improvement does not look very different but you notice it much better with a VMD mouse in your hand.

2. New laser sensor type improves tracking. The dpi values of VMD are higher than those of VMC and VM4. Laser of VMD projects a pin-size beam while lasers of VM4 and VMC project a wide and scattered light beam. Wide and scattered light beams do not work on some surfaces while a pin-size beam provides reliable tracking on most surfaces.

- VMD: 800, 600, 2400 and 3200 dpi
- VMC: 600, 1200, 1800 and 2400 dpi
- VM4: 500, 1000, 1500 and 2000 dpi

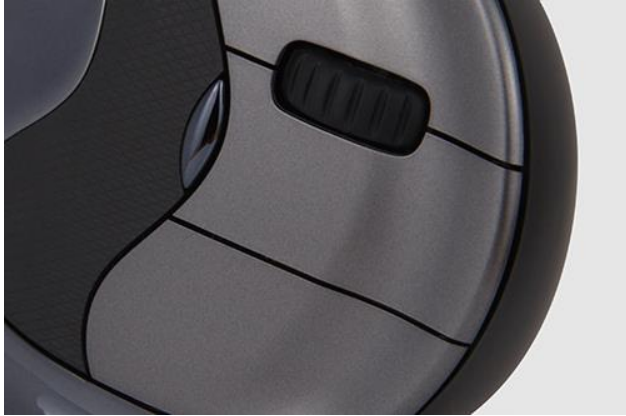

3. 3 mouse sizes of VMD compared to 1 size of VMC and 2 sizes of VM4. Mouse users will find suitable Evluent mouse sizes easier than earlier.

The sizes small and medium are already available for VMD and later there will be the size L too.

4. Magnetic cover of battery compartment and receiver storage. Magnetic cover is easier to open and close than earlier covers.

5. Stylish new looks.

6. With every wireless VMD mouse, there comes a 1.2 meter USB cable. The cable can be used if the connection between the mouse and computer is weak. The receiver can be brought closer to the mouse with the cable.

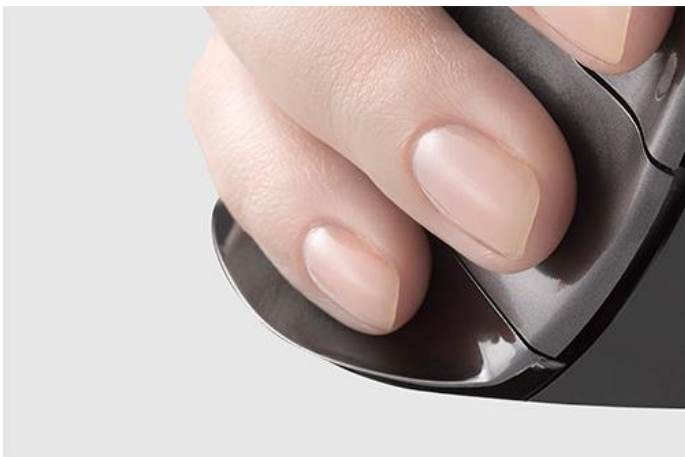

World's First Mouse with Grooved Buttons

Your fingertips rest in a shallow groove on the buttons. This patented innovation secures the mouse in your hands and makes moving it much more precise.

Avoids Forearm Twisting For Comfort

The ergonomic shape supports your hand in a handshake position. Since 2002, users continue to report that Evolvent VerticalMouse provides superior comfort and even relieves their wrist pain.

Extended Lip Prevents Rubbing

An extra wide lip along the bottom edge prevents the last finger from rubbing the desk.

Easy-To-Reach Thumb Buttons

Smartly-placed thumb buttons are both within easy reach at the top and bottom of a contoured thumb rest.

Adjustable Pointer Speed

A speed button behind the wheel allows convenient adjustment without releasing your grip from the mouse.

Pointer Speed Indicators

Up to four lights show pointer speeds from low to high. The dpi values are 800, 1600, 2400 and 3200 dpi.

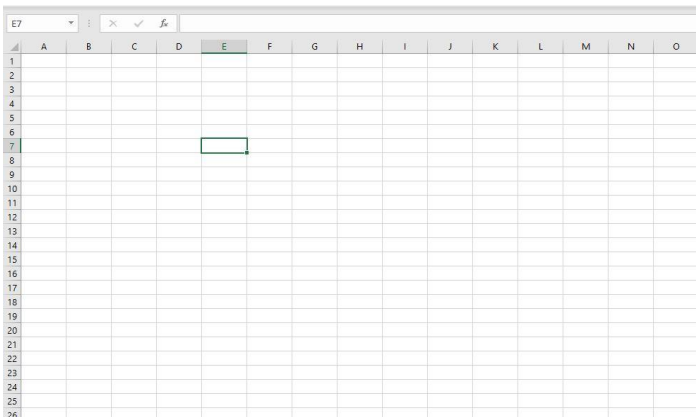

Laser Sensor

A new laser sensor type that projects a pin-size beam ensures a more reliable tracking on most surfaces.

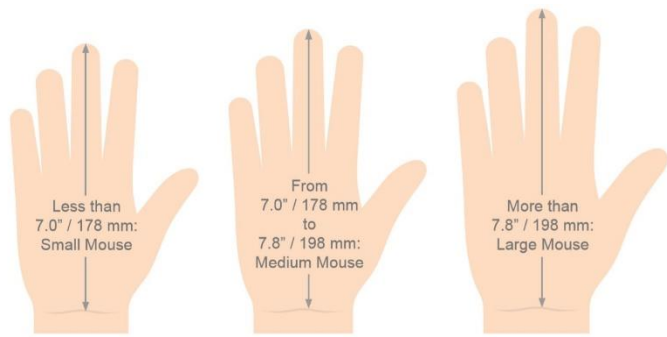

Magnetic Cover

The battery compartment is behind a magnetic cover. The receiver may be stored behind the same cover too.

Horizontal Scroll

Evolution VMD has a special feature of horizontal scrolling. If you want to use it write us in which program (Microsoft Excel, Google Sheets) you want to take advantage of it and we will send you instructions concerned.

There are more mouse sizes than earlier, namely three: small, medium and large.

Wired Models

- VerticalMouse D Small / VerticalMouse D Medium / VerticalMouse D Large Wireless

Part Numbers

- VMDS / VMDM / VMDL (Small, Medium, Large)

Connectivity

- USB cable for full size USB Type-A port. Requires adapter (not included) for USB Type-C port on some notebook computers.

Wireless Models

- VerticalMouse D Small Wireless / VerticalMouse D Medium Wireless / VerticalMouse D Large Wireless

Part Numbers

- VMDSW / VMDMW / VMDLW (Small, Medium, Large)

Battery

- 1 AA battery, included. Battery life is a few months with typical office use.

Connectivity

- USB receiver for full size USB Type-A port. Requires adapter (not included) for USB Type-C port on some notebook computers.

Evoluent mice suit rubber allergic people

- There's no rubber or latex on the surface so the mice can be used by rubber allergic people.

Guarantee

- Evoluent mice have a guarantee of 2 years.

Compatibility of all models

Microsoft Windows®

- The package includes instructions for downloading the driver (Evoluent Mouse Manager) to Windows 7 or a later operating system. The driver is optional but highly recommended since it allows changing the functions of the buttons. VerticalMouse still has basic functionality without the driver.
- The driver can also be downloaded [here](#).

Apple Macintosh®

- The package includes instructions for downloading the driver (Evoluent Mouse Manager) to OS X 10.5 or a later operating system. The driver is optional but highly recommended since it allows changing the functions of the buttons. VerticalMouse still has basic functionality without the driver. Some functions of the Windows driver are not in the Mac driver.
- The driver can also be downloaded [here \(Max OS X 10.5\)](#) or [here \(Mac OS X 10.6 – 10.14\)](#)

Other Operating Systems

- Fixed button functions without a driver. Third party drivers may be available from other vendors.
